The effect of acquisition has been taken place as approved in Board of Directors meeting of RAK Security and Services (Pvt.) Ltd on 20 October 2015.

#### 2. Basis of preparation

#### 2.1 Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs), the Companies Act 1994 and the Securities and Exchange Rules 1987.

The title and format of these financial statements follow the requirements of IFRSs which are to some extent different from the requirement of the Companies Act 1994. However, such differences are not material and in the view of management IFRSs titles and format give better presentation to the shareholders.

#### Authorisation for issue

These financial statements have been authorised for issue by the Board of Directors of the Company on 21 April 2022.

#### 2.2 Basis of measurement

These financial statements have been prepared on historical cost basis except for inventories which are measured at lower of cost and net realisable value.

#### 2.3 Functional and presentational currency

These financial statements are presented in Bangladesh Taka (Taka/Tk/BDT), which is the functional currency and presentation currency of the Company. The figures of financial statements have been rounded off to the nearest Taka.

#### 2.4 Use of estimates and judgements

The preparation of these financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future years affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are stated in the following notes:

Note 4	Property, plant & equipment
Note 5	Investment property
Note 6	Right-of-use assets
Note 17	Deferred tax liability
Note 18	Employees benefit payable
Note 20	Lease liability
Note 24	Provision for income tax
Note 28.1	Impairment on trade receivable

#### 2.5 Reporting period

The financial period of the Company covers one year from 1 January to 31 December each year and is followed consistently. These interim financial statements were prepared for a period from 1 January 2022 to 31 March 2022. The comparative figure cover the period from 1 January 2021 to 31 March 2021/31 Dec 2021 as applicable.

#### 2.6 Going concern

The Company has adequate resources to continue in operation for foreseeable future and hence, the financial statements have been prepared on going concern basis. As per management assessment there are no material uncertainties related to events or conditions which may cast significant doubt upon the Company's ability to continue as a going concern.

#### Impact of COVID-19 pandemic

When assessing going concern assumption of the Company as above, key consideration was the impact of COVID-19 pandemic. The pandemic has caused country-wide lockdown in Bangladesh by the end of March 2020 and Mid of April 2021 which caused closure of outlets/stores of the company's dealers, suspension of production in factory, disruption in the supply chain and closure of physical office requiring employees to work from home. In face of uncertainties related to the impact of COVID-19, management has developed adequate plans to minimize the impact on its financial conditions and liquidity. However, presently situation improved a lot and the economy has been returned back to normalcy. Accordingly, the management believes the going concern assumption will remain unaffected from COVID-19.

#### 3 Significant accounting policies

The accounting policies set out below, which comply with IFRS, have been applied consistently to all years presented in these consolidated financial statements, and have been applied consistently by Group entities.

#### 3.1 Basis of consolidation

These consolidated financial statements comprise the consolidated financial position and the consolidated results of operations of the Company and its subsidiaries (collectively referred to as "the Group") on a line by line basis together with the Group's share in the net assets of its equity- accounted investees.

IFRS-10 "Consolidated Financial Statements" introduces a new control model that focuses on whether the group has power over an investee, exposure or rights to variable returns from its involvement with the investee and ability to use its power to affect those returns. An investor has power over an investee when the investor has existing rights that gives it the current ability to direct the relevant activities that significantly affect the investee's returns. Power arises from rights. An investor is exposed, or has rights, to variable returns from its involvement with the investee when the investor's returns from its involvement have the potential to vary as a result of the investee's performance. An investor controls an investee if the investor not only has the power over the investee and exposure or rights to variable returns from its involvement with the investee, but also has the ability to use its power to affect the investor's return from its involvement with the investee.

#### Subsidiaries

Subsidiaries are enterprises controlled by the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that are presently exercisable are taken into account. The results of operations and total assets and liabilities of subsidiary companies are included in the consolidated financial statements on a line-byline basis and the interest of minority shareholders, if any, in the results and net assets of subsidiaries is stated separately. The financial statement of subsidiaries are included in the consolidated financial statements of the Group from the date that control commences until the date that control ceases. Any gains or losses on increase/decrease in non-controlling interest in subsidiaries without a change in control, is recognised as a component of equity.

#### Loss of control

Upon the loss of control, the Group derecognises the assets and liabilities of the subsidiary, any non-controlling Interest and other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in profit or loss. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently it is accounted for as an equity-accounted investee or as an available-for-sale financial asset depending on the level of influence retained.

#### Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

#### 3.2 Financial assets

#### a) Trade & other receivables

Trade & other receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition trade & other receivables are measured at amortised cost using the effective interest method, less any impairment provision.

#### b) Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, cash at bank including short notice deposits and fixed deposits having maturity of three months or less that are subject to an insignificant risk of changes in their fair value, and are used by the Group in the management of its short-term commitments.

#### 3.3 Financial liabilities

#### a) Trade & other payables

Trade & other payables are recognised initially at fair value less any directly attributable transaction costs. Subsequent to initial recognition, trade & other payables are measured at amortised cost using the effective interest method.

#### b) Borrowings

Interest-bearing borrowings include short term bank loan. Interest-bearing borrowings are recognised initially at fair value less any directly attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost using the effective interest method.

#### 3.4 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects. Paid up share capital represents total amount contributed by the shareholders and bonus shares issued by the Company to the ordinary shareholders. Holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to vote at shareholders' meetings. In the event of a winding up of the Company, ordinary shareholders rank after all other shareholders and creditors and are fully entitled to any residual proceeds of liquidation.

#### 3.5 Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. Cost includes expenditures that are directly attributable to the acquisition of the property, plant and equipment. Maintenance, renewals and betterments that enhance the economic useful life of the property, plant and equipment or that improve the capacity, quality or reduce substantially the operating cost or administration expenses are capitalised by adding it to the related property, plant and equipment. Ongoing repairs and maintenance is expensed as incurred.

An asset is derecognised on disposal or when no future economic benefits are expected from its use and subsequent disposal. Gain or loss arising from the retirement or disposal of an asset is determined as the difference between the net disposal proceeds and the carrying amount of the asset and is recognised as gain or loss from disposal of asset under other income in the statement of profit or loss and other comprehensive income.

#### 3.5.1 Depreciation on property, plant and equipment

Items of property, plant and equipment are depreciated on a straight-line basis in profit or loss over the estimated useful lives of each component. Capital-work-in-progress and land are not depreciated. Depreciation on addition to fixed assets is charged when it is available for use and charging of depreciation on property, plant and equipment ceases at the earliest of the date the assets is classified held for sale in accordance with IFRS 5 and the date that assets is derecognised.

Rates of depreciation on various classes of property, plant and equipment are as under:

Category of property, plant and equipment	Rate (%)
Factory building	5-20
General building	5
Head Office building	5
Plant and machinery	5-10
Mobile plant	10
Electrical installation	10-20
Gas pipeline	10-20
Furniture, fixture and equipment	10
Office equipment	10-20 10-20
Communication equipment Tools and appliances	10-20
Vehicles	10-20
Fire fighting equipment	20

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. Land is not depreciated as it deemed to have an indefinite life.

#### 3.6 Investment property

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured at cost less accumulated depreciation and impairment losses, if any. Cost includes expenditures that are directly attributable to the acquisition of the investment property. Maintenance, renewals and betterments that enhances the economic useful life of the investment property or that improve the capacity, quality or reduce subsequently the operation cost or administration expenses and capitalized by adding it to the related investment property. Ongoing repairs and maintenance is expensed as incurred.

An investment property is derecognized upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in statement of profit or loss and other comprehensive income the period in which the property is derecognised.

#### 3.6.1 Depreciation on investment property

Depreciation charged on the basis of straight line method. Depreciation continues to be charged on each item of investment property until written value of such fixed asset is reduced to Taka one. Depreciation on addition to fixed assets is charged when it is available for use and charging of depreciation on property, plant, equipment & investment property ceases at the earliest of the date the assets is classified held for sale in accordance with IFRS 5 and the date that assets is derecognised.

Rates of depreciation on various classes of investment property are as under:

Category of property, plant and equipment

Rate (%)

Building

Land is not depreciated as it deemed to have an infinite life.

#### 3.7 Capital work-in-progress

Capital work in progress is stated at cost less impairment, if any, until the construction is completed. Upon completion of construction, the cost of such assets together with the cost directly attributable to construction, including capitalised borrowing costs are transferred to the respective class of asset. No depreciation is charged on capital work in progress.

#### 3.8 Intangible assets

Intangible assets that are acquired by the Group (such as designs and trade marks for manufacture of ceramic tiles and sanitary ware) have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses, if any.

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

Intangible assets are amortised on a straight-line basis in profit or loss over their estimated useful lives of 2 to 3 years from the date that they are available for use.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. No internal developed intangible assets capitalized during the period.

#### 3.9 Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the weighted average cost principle, and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity. Materials in transit are valued at cost.

Net realisable value (NRV) is the estimated selling price in the ordinary course of business, less estimated cost of completion and any estimated costs necessary to make the sale.

#### 3.10 Impairment

#### Non-derivative financial assets

Non derivative financial assets are assessed at each reporting date to determine the loss allowance for lifetime expected credit losses, if the credit risk on that financial instrument has increased significantly since initial recognition. When there is no significant increase in credit risk on the financial instruments since initial recognition, the expected credit losses for next 12 months is measured as loss allowance on that financial instrument.

#### Non-financial assets

The carrying amount of the non-financial assets, other than inventories are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the assets' recoverable amounts are estimated. For intangible assets that have indefinite lives, recoverable amount is estimated at each reporting date. An impairment loss is recognised if the carrying amount of an asset or its cash generating unit (CGU) exceeds its estimated recoverable amount.

#### Calculation of recoverable amount

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessment of the time value of money and risk specific to the asset. For an asset that does not generate significantly independent cash inflows, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

#### Recognition of impairment

Impairment losses are recognised in profit or loss. Impairment losses in respect of CGUs are allocated first to reduced the carrying amount of any goodwill allocated to the CGU and then to reduce the carrying amount of other assets in the CGU on a pro-rata basis.

#### Reversal of impairment

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

#### 3,11 Employee benefit schemes

The Group maintains both defined contribution plan and defined benefit plan for its eligible permanent employees. The eligibility is determined according to the terms and conditions set forth in the respective deeds.

#### Defined contribution plan (Provident fund)

Defined contribution plan is a post employment benefit plan under which the Group provides benefits to one or more employees. The recognised Employees Provident Fund is considered as defined contribution plan as it meets the recognition criteria specified for this purpose. All permanent employees contribute 10 percent of their basic salary to the provident fund and the Group also makes equal contribution to the fund. These are administered by the Board of Trustees. The contributions are invested separately from the Group's assets.

Contribution to defined contribution plan is recognised as an expense when an employee has rendered services to the Group. The legal and constructive obligation is limited to the amount it agrees to contribute to the fund.

#### Defined benefit plan (Gratuity)

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods.

Permanent employees are entitled to gratuity on the basis of his latest basic salary for a completed year of service or for service for a period of more than six months, salary of minimum 30 days, or salary of 45 days for a continuous service for more than ten years, it shall be in addition to any payment of compensation or payment of any wage or allowance in lieu of notice due to termination of services of a worker on different grounds. The expected cost of this benefit is included in respective annual statement of profit or loss and other comprehensive income over the period of employment.

#### 3.12 Workers' Profit Participation Fund and Welfare Fund (WPPF)

The Company provides 5% of its net profit before tax after charging such expense as WPPF in accordance with "The Bangladesh Labour Act 2006 amended in 2018".

#### 3.13 Provisions

Provisions are recognised on the reporting date if, as a result of past events, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

#### 3.14 IFRS 9 Financial Instruments

IFRS 9 Financial Instruments sets out requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items including a new expected credit loss model for calculating impairment of financial assets, and new general hedge accounting requirements.

#### i. Classification - financial assets

IFRS 9 contains a classification and measurement approach for financial assets that reflects the business model in which assets are managed and their cash flow characteristics. IFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL).

#### II. Impairment

IFRS 9 introduces a forward-looking 'expected credit loss' (ECL) model. This will require considerable judgement about how changes in economic factors affect ECLs, which will be determined on a probability-weighted basis. The new impairment model will apply to financial assets measured at amortised cost or FVOCI, except for investments in equity instruments, and to contract assets.

Under IFRS 9, loss allowances will be measured on either of the following bases:

- 12-months ECLs: these are ECLs which result from possible default events within the 12 months after the reporting date; and
- 12-Lifetime ECLs: these are ECLs which result from all possible default events over the expected life of a financial instrument.

Lifetime ECL measurement applies if the credit risk of a financial asset at the reporting date has increased significantly since initial recognition and 12-month ECL measurement applies if it has not. An entity may determine that a financial asset's credit risk has not increased significantly if the asset has low credit risk at the reporting date. However, lifetime ECL measurement always applies for trade receivables and contract assets without a significant financing component; the group has a choice to also apply this policy for trade receivables and contract assets with a significant financing component.

The estimated ECL will be calculated based on actual credit loss experience. The group will perform the calculation of ECL rates separately for different types of customers including related parties.

Actual credit losses will be adjusted to reflect differences between economic conditions during the period over which the historical data will be collected, prevalent conditions and the Group's view of economic conditions over the expected lives of the receivables and related party balances.

#### lii. Hedging

IFRS 9 incorporates hedge accounting rules which intend to align hedge accounting with a group's risk management objectives and strategy and to apply a more qualitative and forward looking approach to assessing hedge effectiveness.

Impact of IFRS 9 shown in note no. 36.1 (b).

#### 3,15 IFRS 15 Revenue from Contracts with Customers

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognized.

#### i. Sales of goods

Under IFRS 15, revenue will be recognised when a customer obtains control of the goods.

Revenue will be recognised for the contracts to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognised will not occur. As a consequence, for those contracts for which the group is unable to make a reasonable estimate of return, revenue is expected to be recognised sooner than when the return period lapses or a reasonable estimate can be made.

Based on the group's assessment, the timing of revenue recognition from sale of goods are broadly similar. Therefore, the group does not expect the application of IFRS 15 to result in significant differences in the timing of revenue recognition for these sales.

#### ii. Rendering of services

Under IFRS 15, the total consideration in the service contracts will be allocated to all services based on their stand-alone selling prices. The stand-alone selling prices will be determined based on the list prices at which the group sells the services in separate transactions.

Based on the group's assessment, the fair value and the stand-alone selling prices of the services are broadly similar. Therefore, the group does not expect the application of IFRS 15 to result in significant differences in the timing of revenue recognition for these services.

#### iii. Construction contracts

Contract revenue currently includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments, to the extent that it is probable that they will result in revenue and can be measured reliably. When a claim or variation is recognised, the measure of contract progress or contract price is revised and the cumulative contract position is reassessed at each reporting date.

#### 3.16 IFRS 16 Leases

Under this IFRS 16, leases will be brought onto companies' balance sheets, increasing the visibility of their assets and liabilities. It further removes the classification of leases as either operating leases or finance leases treating all leases as finance leases from the perspective of the lessee, thereby eliminating the requirement for a lease classification test. The IFRS 16 guidance has an increased focus on who controls the asset and may change which contracts are leases.

#### General impact of application of IFRS 16 Leases

IFRS 16 introduces requirements with respect to lease accounting. It introduces significant changes to the lessee accounting by removing the distinction between operating and finance leases and requiring the recognition of a right-of-use asset and a lease liability at the lease commencement for all leases, except for short-term leases and leases of low value assets. In contrast to lessee accounting, the requirements for lessor accounting have remained largely unchanged. Details of these requirements are described in Notes to the financial statements. The impact of the adoption of IFRS 16 on the Group's financial statements is described below.

The group has applied IFRS 16 using the modified retrospective approach, without restatement of the comparative information

#### Impact of the new definition of a lease

The change in definition of a lease mainly relates to the concept of control. IFRS 16 determines whether a contract contains a lease on the basis of whether the customer has the right to control the use of an identified asset for a period of time in exchange for consideration.

The group applies the definition of a lease and related guidance set out in IFRS 16 to all lease contracts.

#### Impact on Lessee Accounting

Former operating leases

IFRS 16 changes how the group accounts for leases previously classified as operating leases under IAS 17, which were off-balance-sheet.

Applying IFRS 16, for all leases (except as noted below), the Group:

Recognizes right-of-use assets and lease liabilities in the statement of financial position, initially measured at the present value of future lease payments;

Recognizes depreciation of right-of-use assets and interest on lease liabilities in the statement of profit or loss; and separates the total amount of cash paid presented within financing activities in the statement of cash flows.

Under IFRS 16, right-of-use assets are tested for impairment in accordance with IAS 36 Impairment of Assets. This replaces the previous requirement to recognize a provision for onerous lease contracts.

For short-term leases (lease term of 12 months or less) and leases of low-value assets (such as personal computers and office furniture), the group has opted to recognize a lease expense on a straight-line basis as permitted by IFRS 16. This expense is presented within rent expenses in the statement of profit or loss.

#### Former finance leases

The main difference between IFRS 16 and IAS 17 with respect to assets formerly held under a finance lease is the measurement of residual value guarantees provided by a lessee to a lessor. IFRS 16 requires that the group recognizes as part of its lease liability only the amount expected to be payable under a residual value guarantee, rather than the maximum amount guaranteed as required by IAS 17. This change did not have a material effect on the group's financial statements.

#### Impact on Lessor Accounting

IFRS 16 does not change substantially how a lessor accounts for leases. Under IFRS 16, a lessor continues to classify leases as either finance leases or operating leases and account for those two types of leases differently. However, IFRS 16 has changed and expanded the disclosures requirements, in particular regarding how a lessor manages the risks arising from its residual interest in the leased assets.

#### 3.17 Finance income and expenses

Finance income comprises interest income on fixed deposits and Short Notice Deposit (SND). Interest Income is recognized in profit or loss as it accrues, using the effective interest rate method.

Finance costs comprises interest expense on overdraft, LTR, term loan, short term borrowings and finance lease. All finance expenses are recognised in the statement of comprehensive income.

Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

Foreign currency gains and losses on financial assets and financial liabilities are reported on a net basis as either finance income or finance cost depending on whether foreign currency movements are in a net gain or net loss position.

#### 3.18 Foreign currency

Transactions in foreign currencies are translated to Taka at the foreign exchange rates prevailing on the date of transaction. All monetary assets and liabilities denominated in foreign currencies at reporting date are translated to Taka at the rates of exchange prevailing on that date. Resulting exchange differences arising on the settlement of monetary items or on translating monetary items at the end of the reporting period are recognised in the statement of profit or loss and other comprehensive income as per International Accounting Standard IAS-21 "The Effects of Changes in Foreign Exchange Rates".

#### 3.19 Taxation

Income tax expenses represents current tax and deferred tax. Income tax expense is recognised in the statement of profit or loss and other comprehensive income except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

#### Current tax:

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous period. Provisions for corporate income tax is made following the rate applicable for companies as per Finance Act 2021.

#### Deferred tax:

Deferred tax has been recognised in accordance with International Accounting Standard IAS-12. Deferred tax is provided using the liability method for temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amount used for taxation purpose. Deferred tax is determined at the effective income tax rate prevailing at the reporting date.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

#### 3.20 Earning per share

The Company presents basic and diluted (when dilution is applicable) earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company with the weighted average number of ordinary shares outstanding during the year, adjusted for the effect of change in number of shares for bonus issue. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, for the effects of all dilutive potential ordinary shares. However, dilution of EPS is not applicable for these financial statements as there was no dilutive potential ordinary shares during the relevant years.

#### 3.21 Determination and presentation of operating segment

Details of product-wise segment reporting as required by IFRS-8 operating segments is followed.

#### 3,22 Contingencies

#### Contingent liability

Contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

Contingent liability should not be recognised in the financial statements, but may require disclosure. A provision should be recognised in the year in which the recognition criteria of provision have been met.

#### Contingent asset

Contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

A contingent asset must not be recognised. Only when the realisation of the related economic benefits is virtually certain should recognition take place provided that it can be measured reliably because, at that point, the asset is no longer contingent.

#### 3,23 Statement of cash flows

Statement of cash flows is prepared under direct method in accordance with International Accounting Standard IAS-7 "Statement of cash flows" as required by the Securities and Exchange Rules 1987.

#### 3.24 Events after the reporting period

Events after the reporting period that provide additional information about the Group's position at the reporting date are reflected in the financial statements. Material events after the reporting period that are not adjusting events are disclosed by way of note.

#### 3.25 Comparatives and reclassification

Comparative information have been disclosed in respect of 2021 for all numerical information in the financial statements and also the narrative and descriptive information when it is relevant for understanding of the current period's financial statements.

To facilitate comparison, certain relevant balances pertaining to the previous period have been rearranged/reclassified whenever considered necessary to confirm to current period's presentation.

#### Financial risk management

The management has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies, procedures and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company has exposure to the following risks from its use of financial instruments.

- Credit risk
- Liquidity risk
   Market risk

#### 36.1 Credit risk

Credit risk is the risk of financial loss to the Company if a client or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's trade receivables and other receivables.

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. In monitoring credit risk, debtors are grouped according to their risk profile, i.e. their legal status, financial condition etc. Trade & other receivable are mainly related to receivables from dealers, receivables from export sales, dain receivables, accrued interest and other receivables. The Company's exposure to credit risk on accounts receivables is mainly influenced by the individual payment characteristics of customers.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position.

#### Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

#### Impact of IFRS 9

The following table and the accompanying notes below explain the original measurement categories under IAS 39 and the new measurement categories under IFRS 9 for each class of the financial assets as at 31 March 2022,

Financial assets Note	Original classification under IAS 39	New classification under IFRS 9	Original carrying New carrying amount amount under IAS 39 under IFRS 9	Impairment loss (Refer note 10.1)
Trade receivable-unrelated 10.1	Loan & receivable	Amortized cost	641,656,913 639,075,709	2,581,204
Trade receivable-related 10.1	Loan & receivable	Amortized cost	654,815,972 648,239,227	6,576,745
Cash & cash equivalent 13	Loan & receivable	Amortized cost	2,660,832,119 2,660,832,119	

- The above table provides information ECLs till date. Impairment provision till Dec 2021 was Tk. 9,155,186 and provision made during the period is Tk. 2,763.
- Trade receivables that were classified as loans and receivables under IAS 39 are now classified at amortised cost. Impairment over these receivables was recognised in the current period on transition to IFRS 9.
- Cash and cash equivalents that were classified as loans and receivables under IAS 39 are now classified at amortised cost. Impairment over these cash & cash equivalent was recognised in the current period on transition to Ħ
- Impalment loss allowance has not been considered on other receivables and bank balances because business is confident to receiver the full amount from the party.

#### c) Againg of receivables

The ageing of trade receivables as at 31 March was:

Not past due 0-90 days past due 91-180 days past due 181-365 days past due over 365 days past due

4, 12	Amount	s in Taka

	1,287,314,937	1,220,402,229

#### 36.2 Liquidity risk

Uquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its fidabilities when become due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company ensures that it has sufficient cash and cash equivalents to meet expected operational expenses, including financial obligations through preparation of the cash flow forecast, prepared based on timeline of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date. Moreover, the Company seeks to maintain short term lines of credit with scheduled commercial banks to ensure payment of obligations in the event that there is insufficient cash to make the required payment. The requirement is determined in advance through cash flows projections and credit lines facilities with banks are necotated accordingly.

The following are the contractual maturities of financial flabilities of the Company:

Profit for the period					215,033,817

		31 Mar 2022 Taka	31 Mar 2021 Taka
39	Calculation of Earnings per share (EPS)	<u> </u>	<u> </u>
	Calculation of earnings per share (EPS) is as under:		
	(a) Profit attributable to equity holders of the Company	243,116,427	215,033,817
	(b) No. of ordinary equity shares	427,968,701	427,968,701
	(c) Weighted average no. of equity shares outstanding (Note 39.1)	427,968,701	427,968,701
	Earnings per share (EPS) for the period (a+c)	0.57	0.50
	Diluted earnings per share for the period (a÷c)	0.57	0.50

#### 39.1 Weighted average number of ordinary shares

The weighted average number of ordinary shares outstanding during the period is the number of ordinary shares outstanding at the beginning of the period, adjusted by the number of ordinary shares issued during the period multiplied by a time-weighting factor. The time-weighting factor is the number of days that the shares are outstanding as a proportion of the total number of days in the period. The weighted average number of shares is calculated by assuming that the shares have always been in issue. This means that they have been issued at the start of the period presented as the comparative figures.

		31 Mar 2022	31 Mar 2021
Outstanding shares		427,968,701 <b>427,968,701</b>	427,968,701 427,968,701

#### 39.2 Diluted earning per share

No diluted earnings per share is required to be calculated for the year as there was no scope for dilution during the year.

#### 39.3 Reason of deviation of earnings per share:

Due to the revised and responsive business strategy taken by the management, sales is increased by 15.74% from BDT. 1,733.72 mn to BDT. 2,006.54 mn. The company registered improvement of cost of sales due to enhanced control on cost compared to previous period which resulting increase of earnings per share from BDT. 0.50 to BDT. 0.57. Reduction of tax rate by 2.5% as per Finance Act 2021 impacting profit after tax eventually, improving earnings per share.

40 Calculation of Net assets value per share (a) Net assets value (Note 14, 15 & 16)	7,208,683,319	6,810,375,902
(b) Weighted average no. of equity shares outstanding (Note 39.1)	427,968,701	427,968,701
Net assets value per share (a+b)	16.84	15,91
41 Calculation of Net operating cash flow per share (a) Net Cash flows from operating activities (Note 42)	473,322,357	444,944,635
(b) Weighted average no. of equity shares outstanding (Note 39.1)	427,968,701	427,968,701
Net operating cash flow per share (a+b)	4.11 1.11	1.04

#### 41.1 Reason of deviation of net operating cash flow per share:

Due to the revised and responsive business strategy taken by the management, sales is increased by 15.74% from BDT. 1,733.72 mn to BDT. 2,006.54 mn. cash collection from the customers has been increased accordingly. As a result, net operating cash flow per share has been increased from BDT. 1.04 to BDT. 1.11.
